Web Development Projects

La Acción – Band Landing Page

- Designed and built a responsive landing page for a musical band using **HTML, CSS, and JavaScript**
- This landing page highlights their video content, showcases their energy and style, and provides clear pathways for visitors to view performances, access contact details, and book services. The layout focuses on visual impact and ease of navigation to convert visits into engagement and bookings.

To Do list

HTML, CSS, and JavaScript

- Mini project of a functional to do list that helps you keep track of tasks or activities you need to complete as well as organizing your day, prioritizing work, and making sure nothing is forgotten.
